(54) Title: **WEB SERVICE CONTRACT SELECTION**

(57) Abstract: The present invention refers to the field of networked computer telecommunication, and in particular to a method and system for processing contract data defining contracts between a service requester and a service provider for services like Web Services to be provided via a network. In order to improve the processing of web services in presence of a multitude of valid contracts between binding a Service Consumer (SC) it is proposed to include (1300) said contract data into a request for said service in order to enable the Service provider to evaluate (1330) and select (1340) a particular contract out said multitude in order to match best the needs of the Consumer.
